

1

ABSTRACT OF THE DISCLOSURE

2 A number lock device, comprising a lock housing, a lock core, a
3 cable, a cover, a movable member, a driving member, a locking plate, and a
4 locking pin. Thus, the number lock device can be operated by the user's one
5 hand only, thereby facilitating the user operating the number lock device. In
6 addition, the correct numbers of the number rings of the lock core of the
7 number lock device can be changed easily and conveniently.
